## **STATEMENT OF FACTS**

10. Intellectual Ventures Management, LLC ("Intellectual Ventures") was founded in 2000. Since its founding, Intellectual Ventures has been deeply involved in the business of invention. Intellectual Ventures creates inventions and files patent applications for those inventions; collaborates with others to develop and patent inventions; and acquires and licenses patents from individual inventors, universities and other institutions. A significant

aspect of Intellectual Ventures' business is managing the Plaintiffs in this case, Intellectual Ventures I and Intellectual Ventures II.

11. Intellectual Ventures' business includes purchasing important inventions from individual inventors and institutions and then licensing the inventions to those who need them. Through this business, Intellectual Ventures enables inventors to reap a financial reward from their innovations, which is frequently difficult for individual inventors to do. To date, Intellectual Ventures has purchased more than 70,000 assets and, in the process, has paid individual inventors hundreds of millions of dollars for their inventions. Intellectual Ventures, in turn, has earned more than \$3 billion by licensing these patents to some of the world's most innovative and successful technology companies which continue to use them to make computer equipment, software, semiconductor devices, and a host of other products.

12. Intellectual Ventures also creates inventions. Intellectual Ventures has a staff of scientists and engineers who develop ideas in a broad range of fields, including agriculture, computer hardware, life sciences, medical devices, semiconductors, and software. Intellectual Ventures has invested millions of dollars developing such ideas and has filed hundreds of patent applications on its inventions every year, making it one of the top patent filers in the world. Intellectual Ventures has also invested in laboratory facilities to assist with the development and testing of new ideas.

13. Intellectual Ventures also creates inventions by collaborating with inventors and research institutions around the world. For example, Intellectual Ventures has developed inventions by selecting a technical challenge, requesting proposals for inventions to solve the challenge from inventors and institutions, selecting the most promising ideas,

rewarding the inventors and institutions for their contributions, and filing patent applications on the ideas. Intellectual Ventures has invested millions of dollars in this way and has created a network of more than 4000 inventors worldwide.

14. On February 16, 2010, the '701 Patent, titled "Masking Private Billing Data By Assigning Another Billing Data To Use In Commerce With Businesses," was duly and lawfully issued by the PTO. A copy of the '701 Patent is attached as Exhibit A.

15. On October 13, 2009, the '382 Patent, titled "Advanced Internet Interface Providing User Display Access of Customized Webpages," was duly and lawfully issued by the PTO. A copy of the '382 Patent is attached as Exhibit B.

18. On August 21, 2007, the '587 Patent, titled "Method for Organizing Digital Images," was duly and lawfully issued by the PTO. A copy of the '587 Patent is attached as Exhibit E.

19. Intellectual Ventures I is the owner and assignee of all right, title and interest in and to the '701 Patent, the '382 Patent, and the '137 Patent and holds the right to sue and recover damages for infringement thereof, including past damages.
